ABOUT US

DELIVERING VALUE SINCE 1996

WHO ARE WE?

A Trusted Leader in the Construction and Maintenance of Onshore and Offshore Oil, Gas, and Governmental Infrastructure across the MENA Region.

With nearly 30 years of experience, **EL-KHOLY** is a leading contractor in the construction and maintenance of oil, gas, and governmental infrastructure across the MENA region. During this time, **EL-KHOLY** has partnered with clients to deliver engineering, advisory, and operational solutions to some of the most complex and critical challenges in both onshore and offshore energy and governmental infrastructure projects.

MISSION STATEMENT

Our mission is to be the most trusted partner and preferred EPC contracting company across the MENA region and globally. We are committed to delivering innovative, high-quality, and groundbreaking onshore and offshore construction and maintenance solutions.

Through a strong focus on Health, Safety, and Environmental standards, and a deep sense of social responsibility, we aim to consistently exceed client expectations while contributing to the advancement of global infrastructure.

VISION STATEMENT

To redefine the standards of EPC excellence by consistently delivering value-driven, safe, and innovative solutions that build trust and long-term partnerships across the MENA region and globally.

WHAT WE DO?

We Offer Industry Leading Construction and Maintenance Services for Onshore and Offshore Facilities.

With our extensive track record and in-depth asset knowledge, we offer a comprehensive range of construction and maintenance services that ensure optimal performance at every stage of your asset's lifecycle.

Whether your asset is newly deployed or approaching its later years, we provide reliable, high-quality support tailored to meet your needs, ensuring peace of mind at every turn.

OUR CORE VALUES

Our Core Values are mirrored
in the word **ETHICS**

EXCELLENCE

TRANSPARENCY

HSE FOCUSED

INTEGRITY

CARE FOR EMPLOYEES
DEVELOPMENT

SUCCESS DRIVEN &
PASSIONATE FOR OUR WORK

EXCELLENCE

We strive for excellence
in every project, ensuring
quality and reliability.

INTEGRITY

We remain steadfast in our
moral and ethical standards,
treating both our external and
internal stakeholders with
fairness and integrity.

TRANSPARENCY

We share our knowledge,
practices, and are open
for constructive feedback.

CARE FOR EMPLOYEES DEVELOPMENT

Employees are our greatest asset;
we foster respect, inclusion, and
growth.

HSE FOCUSED

Committed to health,
safety, environment, and
uncompromising sustainable
development practices.

SUCCESS DRIVEN & PASSIONATE FOR OUR WORK

We are dedicated to excellence
and take great pride in our work.
Our drive for success is fueled by
our determination, ambition, and
unwavering perseverance.

YOUR ASSETS, OUR SOLUTIONS

At **EL-KHOLY**, we leverage our vast industry experience and deep asset knowledge to deliver end-to-end, flexible solutions tailored to your specific construction and maintenance needs. From minimal assistance to full-scale support, we offer a diverse suite of construction, renewal, and rehabilitation services for assets of any size, stage, or location—providing industry-leading service throughout the entire asset lifecycle. We offer:

1. EXPERT LABOR ON DEMAND

We provide qualified and skilled personnel who are trained to meet the specific demands of your site, ensuring top-quality results throughout each phase of your project.

2. STREAMLINED EPC SERVICES

By choosing our integrated Engineering, Procurement, and Construction (EPC) services model, you gain greater value with cost savings in three essential areas: personnel management, efficient supply chain coordination, and consolidated service offerings.

OUR EPC SERVICES MODEL

ENGINEERING
SERVICES

- Design Services
- Project Planning

PROCUREMENT &
SUPPLY SERVICES

- Procurement of Materials
- Supply of Manpower
- Supply of Equipment
- Supply of Scaffolding

CONSTRUCTION
SERVICES

- Core Construction Services
- Core Rehabilitation and Maintenance Services
- Integrated Supporting Services

ENGINEERING SERVICES

At **EL-KHOLY**, our core expertise lies in delivering comprehensive engineering services and support throughout all phases of every project we undertake, from tendering to execution.

We focus on enhancing and maintaining our engineering knowledge base and are committed to the development and training of our team members.

Our approach to engineering is highly customized, shaped by the unique needs of each project and the specific preferences of our clients. We assemble specialized engineering teams tailored to meet the technical requirements of every project.

We adhere to international and local standards and codes of practice in all our designs, ensuring that they meet our client specifications and project functional demands. Our commitment to adding value is reflected in our application of multidisciplinary value engineering principles throughout the project's entire lifecycle.

PROCUREMENT & SUPPLY SERVICES

At **EL-KHOLY**, our Procurement and Supply Chain Division plays a pivotal role in supporting our EPC operations. We are committed to adding value to our clients and projects by embedding supply chain excellence at every stage.

Our multidisciplinary team supports the full lifecycle of procurement and supply—from sourcing and delivery to market intelligence, supplier vetting, and contract management—backed by a robust network of prequalified local and international partners.

A. PROCUREMENT OF MATERIALS

Our Procurement and Supply Chain Division oversees all procurement of materials and services for our company through a dedicated team of experts. Acting as a genuine business partner, we are committed to consistently delivering high-quality products and services.

B. SUPPLY OF MANPOWER

At the very heart of everything we achieve as a company lies our people. They are not just contributors to our operations; they are the driving force behind every milestone we reach and every challenge we overcome.

We believe that the strength of any organization is ultimately measured by the talent, dedication, and expertise of its workforce — and we are deeply committed to attracting, nurturing, and retaining individuals who embody the highest standards of professionalism and technical excellence. Whether engineers, project managers, safety specialists, or highly skilled tradespeople, every member of our team plays an essential role in upholding the quality, efficiency, and safety of our operations.

C. SUPPLY OF EQUIPMENT

At **EL-KHOLY**, we boast a remarkable fleet of owned workshops and equipment, coupled with extensive expertise in land and marine equipment fleet management. This enables us to supply our diverse projects with the most appropriate machinery, meticulously maintained to the highest standards, and ensuring continuous support for onshore and offshore construction and maintenance operations.

WE PROVIDE:

- Heavy Equipment such as cranes, forklifts, manlifts with multi loading capacities.
- Welding machines (diesel/electrical) in compliance with SMAW, GMAW, GTAW, FCAW, SAW, EBW, and PAW welding processes.
- Generators with different voltage ranges.
- Special tools such as manual, automatic, hot and cold cutting tools for pipes and plates with different sizes and thicknesses, as well as lifting gears.
- Sandblasting and coating equipment (air compressors, sand pots, airless spraying machines, and high-pressure hoses...etc.).
- Diving equipment for scuba diving and surface supply diving including oxygen cylinders, air compressors, Kirby helmets, umbilical, CCTV units, recorders, Diver's Decompression Chambers (DDC), and zodiacs...etc.
- Underwater cutting and inspection tools.

D. SUPPLY OF SCAFFOLDING

EL-KHOLY offers end-to-end scaffolding solutions, delivering materials, tools, and certified manpower to safely erect and dismantle scaffolding for all project scopes.

OUR PRACTICES INCLUDE:

- Compliance with BS-EN 12811-1 standards for scaffolding design and erection.
- Use of accessories certified under BS-EN 74-1, 74-2, and 74-3.
- Certified scaffolders and inspectors trained to TG 20:13 guidance.
- Strict adherence to client Permit to Work systems and HSE protocols.
- Full use of fall protection systems (per BS-EN 363).
- Provision of dust, wind, water, and fireproof covers for safety.
- Implementation of the SCAFTAG system with color-coded tagging for effective scaffold status management.

CONSTRUCTION SERVICES

Our diverse suite of asset construction, renewal, and rehabilitation services include all what it takes to carry out onshore and offshore constructions as well as planned and ongoing maintenance throughout diverse professional arenas.

We offer a comprehensive suite of core construction, rehabilitation, and maintenance services including a diverse range of integrated supporting services that is not only an indispensable component of our core offerings but can also be delivered independently. This flexibility allows us to meet the unique needs of our clients while addressing the distinct challenges and requirements of each industry we serve.

OUR CONSTRUCTION SERVICES, AT A GLANCE...

CORE CONSTRUCTION SERVICES

- Offshore Oil & Gas Infrastructure
- Onshore Oil & Gas Infrastructure
- Governmental Infrastructure
- Food Production Infrastructure
- Commercial & Residential Infrastructure

CORE REHABILITATION & MAINTENANCE SERVICES

- Structural Rehabilitation of Offshore Oil & Gas Production Facilities & Spillway Gates
- Structural Rehabilitation of Onshore Energy Production Facilities

INTEGRATED SUPPORTING SERVICES

- Fabrication
- Welding
- Inspection & Testing
- Electrical & Instrumentation
- Firefighting Solutions
- Fireproofing
- Diving
- Civil Works
- Surface Preparation & Protection
- Hot & Cold Insulation
- Emergency Response & Repair
- Equipment Rental
- Chemical Cleaning
- Asbestos Removal & Iron Sheet Installation
- Nitrogen Purging
- Helidecks Safety Nets Installation
- Hot Tapping

CORE CONSTRUCTION SERVICES

OFFSHORE OIL & GAS INFRASTRUCTURE

1. Platform Deck Extensions
2. Platform Components including:
 - Boat-Landings
 - Barge Bumpers
 - Rubber Fenders
 - Riser Guards
 - Firefighting Systems
 - Drainage Networks
 - Ladders
 - Handrails
 - Grating
 - Riser Clamps
3. Offshore Pipelines

ONSHORE OIL & GAS INFRASTRUCTURE

1. Pipelines
2. Separation Stations
3. Oil & Water Storage Tanks
4. Oil Pump Stations
5. Firefighting Systems
6. Pipe Racks
7. All Types of Steel Structure Buildings

GOVERNMENTAL INFRASTRUCTURE

1. Large-Scale Water Pipeline Networks
2. Steel-Support Structures for Airports

FOOD PRODUCTION INFRASTRUCTURE

1. Food Factories Storage Tanks
2. Food Factories Silo Tanks
3. Steel Structures
4. Drinking Water Treatment Plants

COMMERCIAL & RESIDENTIAL INFRASTRUCTURE

1. Firefighting Systems
2. HVAC Systems

I. OFFSHORE OIL & GAS INFRASTRUCTURE

Our extensive portfolio includes over 60 offshore infrastructure projects, reflecting our broad experience.

II. ONSHORE OIL & GAS INFRASTRUCTURE

Our expertise encompasses all aspects of post-exploration and drilling in the Upstream sector, Midstream Petroleum Industry fields, and competitive solutions for Oil and Gas Downstream Processing Units.

III. GOVERNMENTAL INFRASTRUCTURE

EL-KHOLY has earned the trust of governmental engineering professionals to advance the governmental infrastructure and facilities. The repeated contracts awarded to us underscore our proven performance and the ongoing confidence our clients place in our punctual delivery and high-quality execution in this competitive arena.

IV. FOOD PRODUCTION INFRASTRUCTURE

We specialize in developing key infrastructure for the food and pharmaceutical industries. Our expertise lies in the construction of high-quality stainless-steel tanks using S304 and S316 grades, designed for optimal performance and longevity.

V. COMMERCIAL & RESIDENTIAL INFRASTRUCTURE

We specialize in delivering comprehensive solutions for commercial and residential infrastructure, with a strong focus on firefighting and HVAC systems for shopping malls and residential compounds. Our firefighting solutions adhere to the globally recognized NFPA - National Fire Protection Association standards and include:

- Automatic Fire Detection & Alarm Systems.
- Security & Control Systems.
- Hose Reels & Cabinets.
- Automatic Fire Protection Systems.

CORE REHABILITATION & MAINTENANCE SERVICES

I. STRUCTURAL REHABILITATION OF OFFSHORE OIL & GAS PRODUCTION FACILITIES AND SPILLWAY GATES

Structural integrity is the primary safety barrier in managing hazards. Our engineers conduct thorough assessments of offshore facilities, delivering adaptive solutions that evolve with asset needs. Through ongoing client collaboration, we tailor these solutions to optimize lifespan, minimize downtime, and enhance performance.

OUR SERVICES INCLUDE:

- **Comprehensive Condition Assessments**
Identify potential hazards and evaluate their effects to maintain operational reliability.
- **Structural Modifications**
Modify hulls, jackets, and topsides to enhance structural safety and functionality.
- **Inspection & Maintenance**
Conduct regular inspections, maintenance, and repairs to prevent failures compromising safety, the environment, or operations.

II. STRUCTURAL REHABILITATION OF ONSHORE ENERGY PRODUCTION FACILITIES

Onshore infrastructure requires optimized strategies to maximize availability and reliability. We offer tailored integrated rehabilitation services using the latest techniques for pipelines, storage tanks, firefighting systems, drainage networks, and steel structures in facilities like refineries, petrochemical plants, and power plants, keeping your infrastructure resilient in a dynamic energy landscape.

OUR SERVICES INCLUDE:

- **Thorough Condition Assessments**
In-depth evaluations to detect risks and analyze impacts for long-term stability. Using advanced diagnostic tools, our engineers perform detailed inspections and provide comprehensive reports that guide proactive asset management, avoiding unplanned shutdowns and extending the operational lifespan of your assets.
- **Rehabilitation & Reinforcement**
Restore and strengthen aging infrastructure with advanced engineering solutions to extend the life of your assets and reduce the risks of failure.
- **Upgrades & Modernization**
Improve infrastructure efficiency, safety, and sustainability. Our team works closely with you to identify key upgrades to meet the increasing production demands and comply with current regulations.

INTEGRATED SUPPORTING SERVICES

Our core construction services are strengthened by a diverse range of specialized and integrated offerings that support the successful completion of energy and governmental infrastructure projects.

These essential services are directly tied to the construction process, backing each phase from initial site preparation to final commissioning with precision and expertise. Additionally, they can be delivered independently when needed.

SUPPORTING SERVICES EL-KHOLY OFFERS:

FABRICATION

Fabrication is a cornerstone of the construction of oil, gas, and governmental infrastructure, where precision, reliability, and efficiency are crucial to ensuring the successful assembly of offshore platform deck extensions, pipelines, storage tanks, processing facilities, airport steel structures, spillway gates, and governmental buildings.

Our advanced workshops handle a wide range of materials, including **carbon steel**, **stainless steel**, **duplex steel**, and **alloys**. Services span design, cutting, welding, assembly, and testing. Whether it's the fabrication of complex structural steelwork or intricate piping systems, our adherence to international standards and application of stringent quality control measures ensure that every fabricated component is built to withstand the harsh conditions of the oil and gas environment and to meet the governmental strict delivery requirements.

WELDING

At EL-KHOLY, we deliver precise, high-quality welding solutions using advanced techniques such as SMAW, GTAW, GMAW, FCAW, SAW, EBW, PAW, and underwater welding. Our certified team ensures structural integrity in offshore platforms, pipelines, refineries, and tanks. Whether working on large-scale pipeline installations or complex refinery systems, our commitment to quality ensures that every weld meets the rigorous standards required for long-lasting performance in harsh operating environments.

Welding is not just a technical process for us; it is a cornerstone of building the robust infrastructure that drives the success of the oil and gas sector.

INSPECTION & TESTING

At EL-KHOLY, we provide advanced, industry-compliant inspection services, including certified non-destructive testing (NDT) methods such as ultrasonic, radiographic, magnetic particle, dye penetrant, and hydrostatic pressure testing.

These techniques help detect flaws, verify asset integrity, and ensure compliance with standards including ASME, API, ISO, AWS, DNV, ASNT, and AMPP (formerly NACE-SSPC).

ELECTRICAL & INSTRUMENTATION

We offer complete E&I services for power stations, substations, buildings, lighting systems, distribution panels (MCCs, VSDs), ATS panels, fire alarms, cathodic protection systems, and more.

Our engineers operate to IEEE, NFPA 70E, and NEC standards, delivering reliable, code-compliant installations and maintenance.

FIREFIGHTING SOLUTIONS

We supply, install, and maintain fire detection and suppression systems in accordance with NFPA standards.

Solutions include hydrants, sprinklers, foam, CO₂, FM200, Novec 1230, extinguishers, HVAC systems, and security systems—across oil and gas field applications, industrial, commercial, and residential infrastructures.

FIREPROOFING

We deliver fireproofing solutions for all types of infrastructure using tested materials and techniques in accordance with NFPA 30, NFPA 70, and API 2218.

Our cost-effective, high-performance solutions safeguard key structures such as piping, equipment, and steel structures from the devastating impact of fire.

At EL-KHOLY, we're committed to protecting what matters most – your people, your infrastructure, and your reputation.

DIVING

Our team of certified divers and engineers provides unparalleled support for the construction, inspection, maintenance, and emergency repair of underwater oil and gas infrastructure. Using ROVs and advanced tools, we work safely and efficiently in the most challenging offshore environments, following IMCA, AIR, and ADCI standards.

Whether supporting construction or maintenance of your infrastructure integrity, EL-KHOLY is your trusted partner for innovative diving solutions that drive success in the regional energy sector.

CIVIL WORKS

We handle full-scope site development including surveying, site prep, excavation, lifting, backfilling, and restoration—executed safely and in compliance with industry standards. With **EL-KHOLY**, every stage of your project is handled with care, precision, and a focus on achieving long-lasting success.

SURFACE PREPARATION & PROTECTION

Our company excels in providing advanced surface preparation and protection solutions for both onshore and offshore infrastructure. We utilize abrasive blasting, high-performance coatings, and corrosion-resistant linings to ensure full asset protection—fully compliant with **AMPP** (formerly **NACE-SSPC**), **ISO 8501-1/ISO 12944**, and **NORSOK M-501** standards.

We deliver unmatched quality and long-lasting results, even in the harshest corrosive environments.

HOT & COLD INSULATION

Our company specializes in delivering comprehensive hot and cold insulation solutions tailored for oil and gas infrastructure, including pipelines, storage tanks, valves, and processing equipment.

We utilize materials such as mineral wool, foam glass, and polyurethane to enhance thermal efficiency and safety, in accordance with key industry standards including **ASTM C177**, **C335**, **C592**, **NACE SP0198**, **ISO 15649**, **API 570**, and **ASHRAE guidelines**—ensuring long-term performance under extreme conditions.

EMERGENCY RESPONSE & REPAIR

Our company delivers **24/7** emergency repair and fast-track recovery solutions tailored to the Oil and Gas sector.

Specializing in pipelines and storage facilities, our certified teams utilize advanced technologies and align with stringent industry standards, including **API 1160**, **ASME B31.4/B31.8**, and **ISO 29001** to reduce downtime, ensure safety, and maintain operational continuity.

EQUIPMENT RENTAL

We provide heavy-duty equipment for all projects, offering reliable solutions for lifting, civil works, and construction.

We ensure our fleet is meticulously maintained for seamless project execution, so you can focus on delivering results.

CHEMICAL CLEANING

Utilizing advanced chemical solutions, this service removes harmful contaminants, scale, rust, and residual debris from pipelines, tanks, and equipment, mitigating risks of corrosion, blockages, and operational inefficiencies. Services comply with **ASME B31.4/B31.8**, **NACE SP0178**, **API 570**, **ISO 9001**, and **14001**.

ASBESTOS REMOVAL & IRON SHEET INSTALLATION

Our **SGS-trained** crew conducts asbestos removal using full PPE, stringent safety controls, and waste management protocols. We also supply and install durable metal sheets and panels as replacements—ensuring safety and compliance.

NITROGEN PURGING

We offer nitrogen purging to displace reactive gases, prevent combustion, and protect pipeline and tank systems.

Services include displacement and pressure-hold purging in accordance with **NFPA 56**, **TRBS 2152/TRGS 722**, and other international guidelines.

HELIDECK SAFETY NETS INSTALLATION

We install perimeter safety nets on offshore helidecks to prevent falls, complying with **CAP 437**, **DNV**, **ABS**, and **OEUK** standards.

Our modern safety net solutions, such as those constructed from marine-grade stainless steel ensure quick installation, durability, and regulatory compliance.

HOT TAPPING

We perform hot tapping to safely add connections to live pipelines without service interruption. All operations comply with **ASME B31.3** and **B31.4**, with strict safety and precision standards.

KEY PROJECTS

A showcase of landmark infrastructure and energy projects, highlighting our technical excellence, safety commitment, and long-term partnerships.

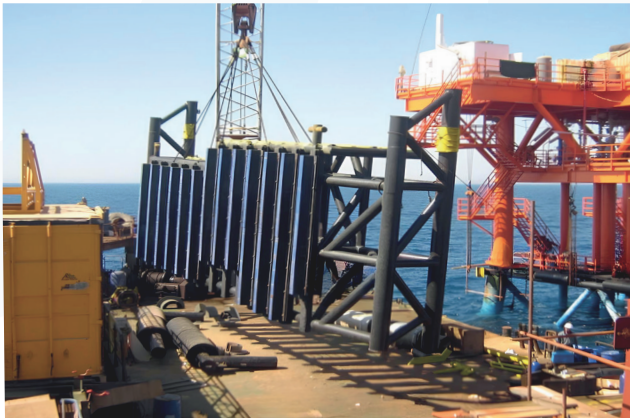

COMPREHENSIVE MAINTENANCE OPERATIONS

EL-KHOLY in collaboration with EGYPT GAS secured a significant 15-year comprehensive maintenance contract with Al-Khafji Joint Operations (KJO) to maintain nearly 150 offshore oil and gas handling platforms. This milestone marks a major step towards our company's expansion into regional markets. Al-Khafji Joint Operations, located

Location: Al-Khafji, Saudi Arabia
Completion: 2022 - Ongoing

in the Arabian Gulf region, is a promising joint venture between ARAMCO Gulf Operations and Kuwait Gulf Oil Company.

OFFSHORE PLATFORMS & PIPELINE NETWORK MAINTENANCE

EL-KHOLY secured continuous 10-year offshore maintenance contracts with the General Petroleum Company (GPC), covering platforms GG, FF, and Amer 2, 4, 6, and 7. The scope of work included replacement of several 45-ton boat landings, installation of rubber fenders and barge bumpers, underwater platform inspections, and platform splash zone coatings. A notable highlight was the repair of

Location: Red Sea, Egypt
Completion: 2006 to 2016 & 2019 - 2020

a 6-inch crude oil pipeline at a depth of 21 meters. Additional activities included ROV seabed surveys, pipeline inspections, free-span correction, cathodic protection, and seabed debris removal.

ESNA SPILLWAY GATES UPGRADING & MODERNIZING

The project involves upgrading and modernizing the control, monitoring, and operating systems and devices for Esna's eleven spillway gates.

The scope of work includes mechanical and civil maintenance, rehabilitation of stop logs and lifting scales, construction of a new steel control-unit structure, and restoration of the suspended bridge. All activities involve

Location: Esna, Egypt
Completion: 2023 - Ongoing

scaffolding and comply with AWS D1.1:2000 welding standards, including visual, magnetic-particle, and ultrasonic testing.

PUMPING STATIONS & PIPELINES INSTALLATIONS

We proudly completed one of Egypt's largest governmental infrastructure projects in Toshka's South Valley, in partnership with global leader ARCHIRODON.

The scope included installing and welding outlet pipelines (Ø1,420–2,820 mm) and inlet pipelines (Ø1,000 mm), totaling around 20,000 diametric inches of welding. Mechanical operations were also executed for three pumping stations along

Location: Toshka, Egypt
Completion: 2002

El-Sheikh Zayed Channel. This project stands as a major milestone in our national contribution, showcasing our expertise in complex piping works and setting new benchmarks in infrastructure execution.

DEPARTURE HALL SHARM EL-SHEIKH AIRPORT

EL-KHOLY, in collaboration with Steel Tec (a SIAC Construction subsidiary), completed steel structure works for Sharm El-Sheikh Airport's departure hall roof.

Designed by the Australian Wade Design Engineers for the American BIRDAIR, the project highlights our capability in complex

Location: Sharm El-Sheikh, Egypt
Completion: 2003

construction and commitment to infrastructure excellence in the city of Sharm El-Sheikh.

OTHER PROJECTS COMPLETED BY EL-KHOLY

FIREFIGHTING & HVAC SYSTEMS REMEDIATION

Location: Hurghada, Sharm El-Sheikh, and Port Said

Complete remediation of firefighting and HVAC systems in General Electric working sites. Project completed in 2017.

CHILLER & FIREFIGHTING PIPING SYSTEMS

Location: Khartoum, Sudan

Manpower, welding, inspections, piping installation, scaffolding, sandblasting, and painting. Project completed in 2017.

COMPREHENSIVE PETROLEUM SERVICES

Location: Eastern Desert, Egypt

Six-year contract delivering full-scope petroleum services, piping systems, and construction support. Project completed in 2008.

AL NOURAN SUGAR FACTORY

Location: El-Saleheyah El-Gedeedah, Egypt

Steel structure, stainless steel tanks, and piping fabricated, installed, and coated. Project completed in 2016.

A large offshore oil rig is illuminated at sunset, with its complex lattice structure and various cranes visible against a colorful sky. The rig is positioned on the left side of the frame, with its lights reflecting on the water. Another smaller rig or platform is visible on the right side of the frame, also illuminated. The sky transitions from a deep blue at the top to a warm orange and pink near the horizon, with scattered clouds. The water in the foreground is calm, showing clear reflections of the rig's lights and the sky's colors.

WHY US

Trusted expertise, certified quality, and end-to-end solutions—delivering complex infrastructure projects safely, efficiently, and on time across challenging environments.

WHY US

QUALITY STANDARDS

Exceeding Expectations with uncompromising quality in every detail.

HEALTH & SAFETY STANDARDS

Safety-First culture through strict standards, training, and compliance.

ENVIRONMENTAL STANDARDS

Sustainable practices guiding every project, from planning to execution.

TEAM EXPERTISE

Powered by experience, driven by expertise, focused on results.

At **EL-KHOLY**, we uphold the highest standards in QHSE—Quality, Health & Safety, and Environment—ensuring every project is executed with care, precision, and integrity.

Our **ISO-certified** experts bring deep industry knowledge and technical excellence across multiple disciplines. Supported by our flexible range of services, we offer clients the confidence of reliable delivery, tailored solutions, and a true commitment to long-term success.

QUALITY STANDARDS

At **EL-KHOLY**, our commitment to quality is embedded in every phase of operations—from initial inquiry to project delivery. Our **ISO 9001 certified** teams implement a comprehensive Quality Assurance Program (QAP) and robust Quality Control and Inspection systems to uphold the highest standards—all executed with a deep understanding of client goals and asset integrity. Operating across multidisciplinary onshore and offshore projects, we ensure

compliance with internationally recognized standards while surpassing client expectations. Our Quality Control staff are highly trained in applying advanced inspection techniques for critical assets such as piping systems, boilers, furnaces, storage tanks, and steel structures. We perform thorough raw material evaluations, precise weld monitoring, and systematic inspections in line with ISO, API, ASME, AWS, DNV, and AMPP (formerly NACE-SSPC).

HEALTH & SAFETY STANDARDS

At **EL-KHOLY**, health and safety are central to all operations. Our **ISO 45001 certified** teams uphold the highest standards across oil and gas infrastructure projects and critical governmental infrastructure works. We foster a “Safety-First” culture through rigorous procedures, ongoing risk assessments, and regular training programs

including **ISO, OSHA, NIOSH, and NEBOSH**. Leadership holds ultimate responsibility for workforce well-being, ensuring compliance with regulations and international best practices. This commitment safeguards our people and guarantees the safe, successful delivery of every project.

ENVIRONMENTAL STANDARDS

At **EL-KHOLY**, we are deeply committed to sustainable development across every aspect of our company's activities, recognizing that responsible growth must go hand in hand with protecting the planet. Our environmental policy is firmly grounded in minimizing ecological impact, preventing pollution at its source, and promoting the careful and efficient use of natural resources.

As an **ISO 14001 certified** organization, our dedicated teams operate in full compliance with all applicable environmental laws, regulations, and industry standards. More importantly, we continuously strive to

go beyond compliance by adopting and applying best-in-class practices that reflect international excellence.

Through innovative engineering solutions, rigorous waste management programs, and continuous environmental monitoring systems, we integrate sustainability principles into every phase of our projects. From planning and design to execution and maintenance, our approach ensures that both terrestrial and marine ecosystems are protected, safeguarded, and preserved—creating lasting environmental value for future generations.

TEAM EXPERTISE

Our people are the backbone of our success. We focus on sourcing and developing highly qualified, certified professionals and skilled tradespeople across disciplines to meet the technical demands of our diverse projects. We supply:

- Technical Office Engineers for shop drawings and planning.
- Field Engineers experienced in project execution.
- QC Engineers for inspections and testing.
- Supervisors and foremen for all project stages.
- Skilled technicians and tradesmen including:
 - Pipe fitters, tank fitters, and offshore crews.

- Welders (all positions), grinders, and helpers.
- Certified electrical technicians.
- Surface preparation and coating teams for onshore/offshore applications.
- Certified scaffolders, scaffolding supervisors, and inspectors (CITB, OSHA or equivalent).
- Professional divers and diving supervisors for underwater operations.

Certifications held by our teams include:
API (510, 570, 580, 653) – CSWIP – AMPP
(formerly NACE-SSPC) – ASNT Level II/III
(UT, RT, MT, PT, VT) – IMCA – AIR.

Unmatched Expertise. Unrivalled Flexibility.
 Delivering Tailored Solutions and Seamless Support.

KEY CLIENTS
